DETAILED ACTION

Claims 1 – 12 have been cancelled. Therefore, claims 13 and 14 are currently pending in this application.

Response to Amendment/Remarks

The rejections of claims 13 and 14 under 35 U.S.C. 112 second paragraphs have been overcome by the amendment filed on August 06, 2007.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a), which forms the basis for all obviousness rejections, set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claim 13 is rejected under 35 U.S.C. 103 (a) as being obvious by US Patent No. 4,286,090 or 3,838,126.

Art Unit: 1626

Applicants instant elected invention in claim 13 compounds of Formula

wherein

R^3 represents chlorine, fluorine, methyl or trifluoromethyl,

n represents 1 or 2, and

R^4 represents hydrogen, optionally substituted alkyl, optionally substituted alkenyl, alkoxyalkyl, alkoxycarbonylalkyl, alkoxycarbonyloxyalkyl, alkylsulphonyl, diaminocarbonyl; in each case optionally substituted aryl, arylalkyl or arylsulphonyl; in each case optionally substituted cycloalkyl or cycloalkylalkyl or in each case optionally substituted heterocyclyl or heterocyclylalkyl, and the position of substitution of the tetrazole on the phenyl ring is in the 3- or 4-position,

wherein said agrochemical compound is an intermediate for the development of an agrochemical compound, said agrochemical compound being selected from the group consisting of an insecticide, an acaricide and a nematicide.

Determination of the scope and content of the prior art (MPEP §2141.01)

Art Unit: 1626

RN 54013-22-8 CAPLUS
CN Benzenamine, 2-(1H-tetrazol-5-yl)-5-(trifluoromethyl)- (9CI) (CA INDEX NAME)

US Patent No. 4,286,090, teach compounds of Formula

RN 26803-78-1 CAPLUS
CN Benzenamine, 2-chloro-6-(1H-tetrazol-5-yl)- (9CI)

Ascertainment of the difference between the prior art and the claims (MPEP §2141.02)

The difference between the prior art of U.S Patent No. 4,286,090 or 3,838,126 and the claims of present invention is that the tetrazole is attached to the phenyl ring at 3 or 4 position as opposed to 2 position of the prior art. The intended use of the compounds as intermediate for the development of an agrochemical compound does not bear any patentability weight.

Finding of prima facie obviousness--rational and motivation (MPEP §2142-2413)

One skilled in the art would have found the claimed compound prima facie obvious because it is well established to those skilled in chemical art, one isomer is not such an advance a known member of series as requires invention because chemists knowing properties of one member of series would in general know what to expect in similar members Nothing unobvious is seen in substituting the known claimed isomer for the structurally similar isomer, as taught by US Patent No. 4,286,090 or 3,838,126, since such structurally related compounds suggest one another and would be expected to share common properties absent a showing of unexpected results. In re Norris, 84 USPQ 458 (1950). Therefore, the instant claimed compounds would have been suggested to one skilled in the art.
